

## Water Management & Groundwater Monitoring

### Smart Instrumentation

IoT-enabled flowmeters and DWLR systems with live telemetry, 4G/NB-IoT connectivity, and IP68 protection.

### Environmental Compliance

CGWA-compliant groundwater auditing and hydrogeological impact assessments for industries and projects.

### Rainwater Harvesting

Design and installation of recharge pits and rainwater harvesting systems for sustainable water conservation.

### Borewell Drilling

Professional borewell drilling with yield testing and hydrogeological site assessment for optimal groundwater access.

## Complete Solutions for Water Management & Environmental Compliance

Sri Laxmi Sai Scientific Services delivers end-to-end water resource solutions — from smart IoT-enabled flowmeters and groundwater level recorders to hydrogeological studies and borewell drilling. We combine cutting-edge technology with field expertise to ensure regulatory compliance and sustainable water use.

### Our Core Capabilities:

**Ultrasonic Smart Water Flowmeters**  
**Digital Water Level Recorders (DWLR)**  
**Groundwater Auditing & Compliance**  
**Hydrogeological Impact Studies**

Precision instruments. Reliable data. Sustainable outcomes.

## SRI LAXMI SAI SCIENTIFIC SERVICES

**NABL Accredited & CGWA Compliant Services**

Your trusted partner for water management, groundwater monitoring, and environmental compliance. Serving industries, municipalities, and government bodies across India with precision instrumentation and expert engineering services.

**Hyderabad, India |**  
**[saiscientific.dhaara@gmail.com](mailto:saiscientific.dhaara@gmail.com)**

# Smart Hardware & Telemetry Solutions

Precision instruments for real-time water monitoring and CGWA compliance.

## Our Products

**Series** : Dhaara & MIRA DWLR  
**Network** : 4G / NB-IoT Dual SIM  
**Protection** : IP68 Rated  
**Compliance** : CGWA Approved

Live telemetry with cloud dashboard and real-time alerts.

## How to Get Connected

01

### Dhaara Ultrasonic Flowmeter

Non-intrusive clamp-on design for accurate flow measurement in water pipelines.

02

### Live Telemetry & Cloud Access

Real-time data transmission via 4G/NB-IoT dual SIM with secure cloud dashboard.

03

### MIRA DWLR Series

Piezo-resistive sensing for precise groundwater level recording with CGWA compliance.

04

### Install & Integrate

Easy borewell deployment with automated logging and remote configuration tools.

## Key Product Benefits

### IP68 Weatherproof Protection

Fully sealed enclosures rated IP68 ensure reliable operation in harsh field environments.

### Dual SIM 4G / NB-IoT

Uninterrupted connectivity with automatic network failover for continuous data uptime.

### CGWA & NABL Compliant

All instruments meet Central Ground Water Authority standards for regulatory reporting.

### Piezo-Resistive Sensing

High-accuracy pressure sensors deliver stable groundwater level readings year-round.

# Engineering & Environmental Services

Expert solutions for sustainable groundwater management and compliance.

## Our Services

**Division** : Groundwater & Hydrology  
**Scope** : Auditing & Impact Studies  
**Cert.** : NABL / CGWA  
**Region** : Pan India

**Contact Sales Manager Andra Naveen for a site assessment today.**

## How to Engage Our Services

01

### Groundwater Auditing

Comprehensive audits measuring extraction volumes, aquifer levels, and compliance with CGWA norms.

02

### Hydrogeological Impact Assessment

Detailed hydrogeological studies assessing groundwater impact for industries, infrastructure, and urban projects.

03

### Rainwater Harvesting

Design and installation of recharge pits, percolation trenches, and rooftop harvesting systems for sustainable replenishment.

04

### Borewell Drilling

Professional borewell drilling with aquifer testing, yield measurement, and water quality analysis.

## Benefits of Our Engineering Solutions

### CGWA Regulatory Compliance

All audits and studies meet Central Ground Water Authority norms, ensuring full legal compliance for your operations.

### NABL Accredited Reports

Water quality and hydrogeological reports certified under NABL accreditation for regulatory submissions.

### Sustainable Water Security

Rainwater harvesting and recharge solutions replenish aquifers and reduce dependency on external water sources.

### End-to-End Project Support

From site survey and drilling to monitoring and compliance reporting — complete project lifecycle management.
